Summary

Full-stack software developer with expertise in front-end and back-end development.

Skills

Git | C | React | Sql | JavaScript | Node js | Firebase | MongoDB | HTML | CSS | Bootstrap

Work Experience

SKIFIN IT SERVICES LLP. | Application Analyst   **May'23 - present**

- Resolved complex technical issues and bugs to enhance system reliability and perfomance.
- Developed and implemented troubleshoot procedures to quick identify and resolve problems
- Gained experience in creating components and fixing styling issues through styled components
- Worked on react developer writing efficient and scalable code.

Projects

PDF Form Automation System.
deployed on netlify, optimizing file sizes for efficient downloads, while ensuring scalability and data security.

- Designed and implemented multiple forms for diverse data collection needs.
- Utilized modern web technologies such as HTML, CSS, JavaScript, and React for form development.
- Ensured user-friendly experience by optimizing the form submission and PDF generation workflow.
- Successfully deployed and maintained the system, ensuring reliability and scalability.

Interactive PDF Data Retrieval Interface
Implemented a chat-based interaction system allowing users to query information from PDFs conversationally.

- Developed a user-friendly frontend interface using React for extracting data from PDF documents.
- Implemented a chat-based interaction system allowing users to query information from PDFs conversationally.
- Utilized React components to create a responsive and dynamic user experience.
- Collaborated with backend developers to integrate the frontend with data extraction APIs.
- Ensured cross-browser compatibility and accessibility standards adherence.

QR Code Menu: Streamline Dining Experience
Revolutionize dining with contactless QR code menus for faster service, real-time updates, and engaging experiences.
- Developed an advanced QR code solution with HTML, CSS, and JavaScript for seamless hotel menu viewing and ordering.
- Improved customer experience with easy cross-platform access and user-friendly navigation.

ReactFire E-commerce Platform
UI Projects
- Developed a robust e-commerce website using React, leveraging the Context API for state management.
- Designed a responsive and visually appealing user interface for optimal browsing and shopping experiences.
- Enhanced website performance and security through optimized code and Firebase's built-in authentication and security features.
- Collaborated with designers and backend developers to ensure seamless integration of frontend and backend functionalities.
